
Title: Book VII: Spirituality

Author: Garlan Trynthlas

I laugh in the face of
those who claim to be
followers of the virtues
and say they understand
spirituality. A ridiculous
concept that attempts to
fool you into thinking you
understand more about
yourself and the world
around you by some
introspective awareness.

Here I speak from far
greater experience than
others who would preach
on this virtue - there
are two realms that we
exist in: the physical and
the ethereal. The physical
realm is that of the
present, filled with
purpose and tangible
elements. The ethereal is
a realm of mists, a grey
and dreary place that
exists without needs or
meaning. Linger too long
in the ethereal and you
will lose your way, your
purpose, and eventually
your own self.

Such is the world, and so
I tell you there is no
cause for any meaningless
attempt at understanding
how the virtues relate to
one's self. The virtues
simply ARE, and they can
be followed or not.
Such is the truth of the
virtue of spirituality.
